PROFESSIONAL SUMMARY

Motivated fresh BSc graduate in Computer Science & Engineering with strong expertise in programming, frontend development, machine learning, and competitive programming. Currently serving as Lead Developer, delivering production-grade WordPress, WooCommerce, and Shopify solutions for international clients. Skilled in React.js, Python, C++, and data science tools. Experienced in building impactful projects, publishing peer-reviewed research, and competing on global platforms. Passionate about solving real-world problems using AI and explainable AI (XAI) techniques.

EXPERIENCE

Lead Developer
Real Deal IT Center

December 2024 – Present
realdealitcenter.com

- Lead end-to-end website development projects, coordinating development activities across the team to ensure timely, high-quality delivery.
- Manage project workflow, planning, and implementation from requirement gathering through deployment.
- Develop and customize WordPress and WooCommerce websites, building tailored web solutions aligned with client business goals.
- Ensure responsive design, usability, and performance optimization across all delivered products.
- Translate client requirements into functional, scalable business solutions that drive measurable results.

WEB DEVELOPMENT & E-COMMERCE PROJECTS

Al Haayaat Ltd — Shopify E-Commerce Store

2025

Technologies: Shopify, Liquid, Responsive Design

Built a complete Shopify e-commerce store with a customized design and user interface. Integrated product management and shopping functionality while improving responsiveness and the overall customer experience.

Live Store: alhaayaatltd.co.uk • **Proof of Work:** [Demo Video](#)

Real Deal IT Center — WordPress Service Website

2025

Technologies: WordPress, PHP, HTML5, CSS3, Responsive Design

Developed a WordPress-based corporate service website with responsive pages and structured service sections. Customized the site architecture and content layout while optimizing usability and performance.

Website: realdealitcenter.com • **Proof of Work:** [Demo Video](#)

Bross Slice and Grill — WooCommerce Restaurant Website

2025

Technologies: WordPress, WooCommerce, PHP, Responsive Design

Delivered a WooCommerce-based restaurant website with integrated online ordering and menu management

features. Customized the UI and customer interaction flow while ensuring responsive design and an improved user experience.

Website: brossliceandgrill.co.uk • **Proof of Work:** [Demo Video](#)

EDUCATION

Degree	Details
B.Sc. in CSE	Sonargaon University, Bangladesh CGPA: 3.76/4.00 (2025) Undergraduate Thesis: A Reliable and Efficient Approach to Suicidal Ideation Detection in a Low-Resource Language Coursework: Data Structures, Algorithms, Discrete Mathematics, Numerical Methods, OOP, AI, OS, Machine Learning, Image Processing and Computer Vision, Compiler Design, Software Engineering, DBMS, Android App Development, Computer Architecture, etc.
HSC	Science, Imperial College Moulvibazar GPA: 4.17/5.00 (2020)
SSC	Science, Nadampur High School GPA: 4.33/5.00 (2018)

MACHINE LEARNING & AI PROJECTS

XAI Bank Loan Prediction (Random Forest – 98.54% Accuracy) 2025

Technologies: Python, scikit-learn, Random Forest, LIME (XAI), Pandas, Seaborn

Developed an explainable ML model for credit policy approval prediction. Achieved 98.54% test accuracy with LIME interpretability.

[Kaggle Notebook](#) • Dataset: [Loan Data](#)

Bangla Suicidal Ideation Detection (Undergraduate Thesis) 2024–2025

Technologies: Python, TensorFlow/Keras, NLP, LSTM, BERT variants

Designed and benchmarked classifiers for Bangla suicidal ideation detection in social media text.

DATASETS

Bangla Suicidal Intention Dataset 2025

13,288 Bengali social media texts labeled for suicidal intention detection (binary classification: 0 = Non-suicidal, 1 = Suicidal).

This dataset was created as part of the undergraduate thesis and is publicly available for research purposes.

DOI: [10.5281/zenodo.17528394](https://doi.org/10.5281/zenodo.17528394)

Link: [Zenodo Dataset Page](#)

NATIVE FRONTEND WEB PROJECTS

Technologies: HTML5, CSS3, Vanilla JavaScript (no frameworks)

Collection of responsive, interactive web applications demonstrating strong frontend fundamentals, DOM manipulation, event handling, form validation, and real-time interactivity.

Repository: github.com/Jahangirhussen/HTML_CSS_JS_native_projects

- **BMI Calculator** — Real-time BMI computation with validation and classification.
- **Typing Speed Test** — WPM/accuracy tracker with timer and feedback.

- **URL Shortener** — Client-side shortening tool with copy functionality.
- **Native Calculator** — Arithmetic calculator with keyboard support.
- **Multi-Page Portfolio** — Responsive multi-page site with navigation and styling.

PYGAME GAME DEVELOPMENT PROJECTS

Technologies: Python, Pygame

Developed interactive 2D games showcasing game loops, collision detection, event handling, minimax AI, scoring, and user experience design.

Repository: github.com/Jahangirhussen/Pygame

Gameplay Videos: [YouTube Playlist](#)

- **Block Dodger** — Avoid falling blocks with increasing speed and score tracking.
- **Snake Game** — Classic snake with food collection, growth, and collision logic.
- **Tic Tac Toe (Human vs AI)** — Unbeatable AI using minimax algorithm.

HARDWARE & EMBEDDED PROJECTS

Automatic Railway Gate System — Hardware-based automated gate control with sensors and actuators.

Demo Video: [YouTube Short](#)

Wi-Fi Deauther/Jammer — Basic hardware device for controlled signal interference (educational/demo purpose only).

Demo Video: [YouTube Demo](#)

SKILLS & TECHNOLOGIES

Programming Languages: C, C++, Java, Python, JavaScript, HTML, CSS, C#, R

Frontend & UI/UX: React.js, HTML5, CSS3, Responsive Design

CMS & E-Commerce: WordPress, WooCommerce, Shopify (Liquid), PHP

ML/Data Science: TensorFlow, Keras, scikit-learn, Pandas, NumPy, LIME (XAI)

Game Development: Pygame

Database & Tools: MySQL, MongoDB, Git, VS Code, Jupyter Notebook

Others: MS Office Suite, LaTeX, Embedded Systems (Hardware Interfacing)

ACHIEVEMENTS

- ICPC Preliminary 2024 — Ranked 360/2500 teams
- ICPC Preliminary 2023 — Ranked 1170/2500 teams
